

Safe removal of lateral flow test kits and PPE waste from COVID-19 testing bays

Our process follows government guidance through the Environment Agency regarding the collection and safe onward disposal of LFT cartridges and associated paraphernalia. eg PPE Collection & disposal of Lateral Flow Test (LFT) Kits

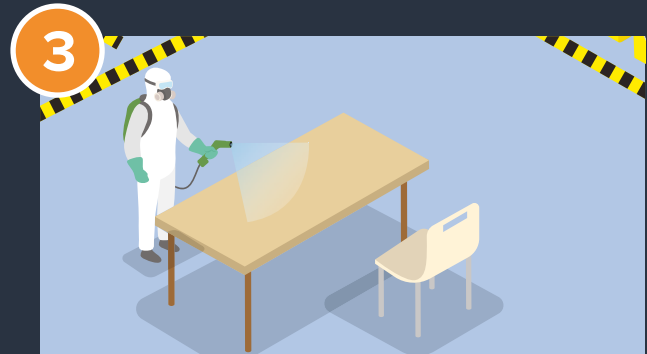

This is how our simple 5-step service works

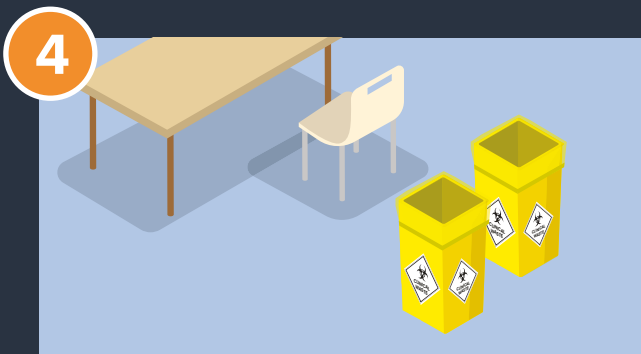

1 We bring UN-approved flat packed clinical waste bins to your premises. Once filled, simply seal the bin and move it to your agreed dedicated location

2 At agreed time intervals – i.e. daily, weekly – we collect your Lateral Flow Test Kit and PPE waste

3 We carry out electrostatic spray COVID-19 cleaning of your test bay areas (**optional**)

4 We provide you with replacement flat packed UN approved Griff boxes at each visit

5 In line with Government guidance SafeGroup incinerate your waste and provide full documented paperwork

From £135 + VAT per collection [^]

SafeGroup can leave boxes and bags as required on sites thereby operating an exchange system to minimise contact risk.

Optional service - Electrostatic COVID-19 clean of test bay areas **Prices start from £50 +VAT**

Tel: **0800 668 1268** or Email: **info@thesafegroup.co.uk**
www.thesafegroup.co.uk

[^] price dependent on frequency of collection and volume of waste.

Regulations are changing rapidly in this area and SafeGroup will ensure that the waste is correctly coded/stored/transported and treated in line with the latest guidance.
