# Safer, cleaner, better

Reopening work spaces that have not been fully used for over a year will be a major challenge as the COVID-19 lockdown comes to an end.

SafeGroup is supporting clients as they implement their back to workplace strategies.

We can deliver a range of high quality specialist cleaning, environment hygiene and waste removal services to help prepare buildings and workspaces. So teams can return safely and with confidence.

## Specialist cleaning

Our planned, periodic and reactive cleaning services will help you prepare premises. Including hygienic deep cleans to remove grime and disinfect all surfaces and emergency responses to floods caused by burst pipes.

## Touchpoint Shield™

Touchpoint Shield™ is our new antimicrobial coating service. It's effective against SARS-Cov-2 and can dramatically reduce cleaning costs. We also provide antimicrobial spray disinfection if that is also needed.

## Waste removal

A return to work may require a change of use or clear-out. Our highly responsive waste removal teams are ready to help. We are also experts in food waste and peak demand waste collection.

## Pest Solutions

Our pest solutions service, available in London and the South East, will help you deal with any pest problems that have emerged during lockdown. We use the latest habitat exclusion techniques to control your costs.

# Futureproofing Workplace Hygiene

## Introducing a new concept in environment hygiene.

Touchpoint Shield™, from SafeGroup, is an advanced antimicrobial coating that prevents the build-up of bacteria and viruses, including SARS-CoV-2, on both hard and soft surfaces.

Touchpoint Shield™ helps our clients protect their teams and customers against potentially harmful microorganisms, enhancing wellbeing, while significantly controlling cleaning costs.

## Touchpoint Shield™ – 6 Key Benefits

- ✓ Destroys harmful microorganisms including SARS CoV-2
- ✓ Highly durable – lasts up to three years
- ✓ Near invisible – no change to look of space
- ✓ Reduces cost through reduced touchpoint cleaning
- ✓ Improves staff and customer confidence and wellbeing
- ✓ Sustainable support for long-term hygiene strategies in new 'hybrid' work environments

## Unique antimicrobial coating

Touchpoint Shield™ combines the durability of a nanoceramic coating with the proven anti-microbial power of silver ion technology.

Working together, they form a near-invisible barrier that destroys bacteria and viruses every minute of the day and night.

No other antimicrobial product currently on the market can promise to provide protection as effective and long-lasting.

Laboratory tests have proven Touchpoint Shield™ to be 99.9+% effective against SARS-CoV-2 and a wide range of bacteria that commonly cause illness.

Field trials have shown clients can reduce high touchpoint cleaning by up to 80% while improving antimicrobial protection.

## Better environment hygiene

- + Maximum reassurance and wellbeing
- + Reduced cleaning costs

# Planned and Emergency Cleaning

Whether you require emergency, planned or periodic specialist cleaning, we have the expertise, technology and equipment to deliver an exceptional service. From infection control and decontamination to high-level building facade cleaning, we have you covered.

We offer nationwide specialist cleaning services, delivered by fully accredited and highly trained operatives.

## Hygienic deep cleaning

With over a year of sub-optimal or no use, deep cleaning should be a first task. Our teams are experts in this field, even for the most challenging projects. We will leave your space hygienically clean, bright and fresh.

## COVID-19 disinfection

The threat and concern relating to COVID-19 will remain for a long time. SafeGroup teams are experienced at carrying out electrostatic disinfection spraying to make environments safer and reassure worried staff.

## Floor cleaning and treatment

SafeGroup's floor deep cleaning, sealing and anti-slip coating service will ensure your floors are safe and compliant. We are working with sports centres, spas, hotels and retailers as they reopen after lockdown.

## Emergency cleaning

Premises that have been underused can spring surprises. Our emergency cleaning teams are ready to clean floods caused by burst water pipes, sewage spills and fire damage, as well as carry out needle sweeps.

## What our clients say

“ When two high-contributing shops found themselves under a least a metre of water due to flooding, SafeGroup attended over the weekend and worked miracles to leave the shops looking fantastic. The feedback from both shops has been superb. I can't recommend SafeGroup highly enough. ”

**Brian Campbell**, Ladbrokes Coral

## Specialist cleaning

Our in-house teams of qualified and experienced specialist cleaning technicians operate across the UK. They are ready to respond quickly and safely to deal with the priority hygiene and visual cleanliness tasks required by your back to workplace strategy.

## Pest solutions

As restaurants, hotels and bars reopen after lockdown, rats and mice will be the unwelcomed guests looking for free meal. Other pests, such as cockroaches, could become a big nuisance in hospitality premises and offices.

Operating across London and the South East, SafeGroup provides advanced pest solutions, including habitat exclusion, that clear infestations, removing threats to health and business success.

## External structure cleaning

Now could be the best time to clean premises, making them welcoming for staff and customers. Have empty premises been graffitied? We can help. We can do pressure washing and high level access cleaning.

Rodent Control

Bird Control

Crawling & Flying insect Control

# Waste Removal

SafeGroup provides unrivaled response times to manage emergency waste problems anywhere in the UK.

We work for waste companies, brokers, retailers, construction firms and local authorities, among many others, safely dealing with urgent waste issues, including food refrigeration breakdowns, product recalls and fly-tipping incidents.

## Designed for waste

The first vehicles in a £0.5m expansion of our waste collection fleet are being delivered. They include new bespoke lightweight tipper vans with larger capacities up to 17.3 cubic metres.

## Smarter technology

We've merged our work order and CRM systems into one cutting edge platform, for faster, more reliable and compliant service, backed by accurate and transparent billing.

## Skilled operatives

We've improved training, including a new waste operative induction programme, our most comprehensive yet, to create a professional, safe and effective waste team.

“ In the time we have used SafeGroup services I have found them to professional, helpful and responsive, with great customer service and communication. They have always met last-minute requests and their work is always completed to a high standard. I would be happy to recommend SafeGroup to other companies.

**Megan Patten** | Site Readiness Supervisor, Project Screen by Prenetics

### Food waste collection

As the hospitality industry gets back into gear, we are ready to help. SafeGroup provides a fast, reliable national food waste collection service, including freezer breakdowns and stock clearance.

### Wait and load waste collection

Retailers, restaurants, and office-based businesses are likely to want to reconfigure and refit services in the months ahead. Our wait and load waste collection service is the ideal way to deal with any waste created.

### Peak demand waste collection

Waste companies, restaurants and bars that need additional support with waste collection over the coming months can rely on SafeGroup. Our peak demand waste collection service will respond rapidly to surges in demand.

### Clinical waste collection

COVID-19 testing is likely to continue for months to come. SafeGroup already provides clinical waste collection services for testing centres across the UK, along with site disinfection services.

### Fly-tip collection

While you have been away, the fly-tippers may have paid a visit. Our fast fly-tip collection service will clear any site across the UK, ensuring potentially hazardous and unsightly waste is removed safely.
